ABOUT US

Zhejiang Topology Intelligent Technology Co., Ltd. was established in June 2016, fully invested and controlled by JIANDE WUXING BICYCLE CO., LTD., with founding members from Wuxing Bicycle (Hangzhou) R&D Center. We are a technology company specialized in the design and development of electric bicycle meter solutions. The company has departments for design, R&D, marketing, production and manufacturing, and all of our designs, from industrial design to product structure, as well as hardware design to software development, are independently created. Through our design, development, and manufacturing capabilities, we provide customers with the best application experience and differentiated value-added products, continuously leading the market trends and direction.

PROFESSIONAL MANUFACTURING

Our factory is certified with ISO9001 and TS16949 management system certification. With a mature ERP system, we coordinate internal processes and factory processes effectively. We have also built a new instrument production workshop, equipped with numerous automatic/semi-automatic production equipment to ensure the consistency of production processes. By consolidating our R&D platform, structure, processes, and manufacturing processes, we aim to achieve a more stable, reliable, and faster production of products in large quantities.

DZ39

Color LED display type

Dark semi transparent PC window material

3 Hard plastic buttons

Can be matched with central display

SPECIFICATIONS

Dimensions/ Size	L 44mm W 44mm H 47mm
Weight (g)	25g
Material	PC/ABS/PA
Operating Temperature	-20°C ~ 60°C

Core Data

Display Type	Color LED
Nominal Voltage	DC 24V/36V/48V
Current	18mA ~ 25mA /36V

Mounting Parameters

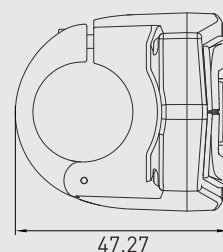

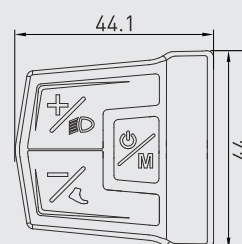

Communication	UART/CAN
Handlebar for Holding	Ø 22.2

Display Information

PAS level / battery indicator
error alarm / walk etc.

Tests& Certifications

Waterproof	IPX5
Cerifications	RoHS/CE

MAIN FEATURES

Simplified to the extreme 5-segment multi-color LED display.

It can indicate the power and assist level at the same time.

Can combine with the center display.

It is applicable to EN 15194-2017.

NEW

DZ40

1.3" Monochrome LED display type

4 Hard buttons

DZ40BT

Arc display interface, hide button

SPECIFICATIONS

Dimensions/ Size	L 48mm W 27mm H 44mm
Weight (g)	28g
Material	PC/ABS/PA
Operating Temperature	-20°C ~ 60°C

Core Data

Display Type	LED
Nominal Voltage	DC 24V/36V/48V
Current	18mA ~ 25mA /36V

Mounting Parameters

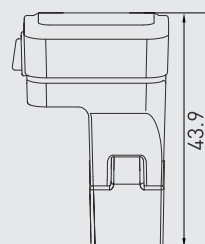

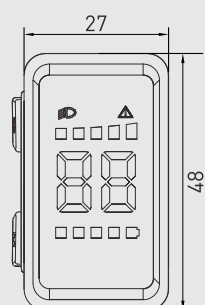

Communication	UART
Handlebar for Holding	Ø 22.2

Display Information

PAS level / speed / battery indicator
light status / error alarm / walk etc.

Tests & Certifications

Waterproof	IPX5
Certifications	RoHS/CE

MAIN FEATURES

Extremely simple surface display design,
completely hide the operation button.

It is not only the display screen but also
the operation button, which ensures the
operation feel and controls the product size
to the extreme.

High quality alloy material;

No screw assembly process;

Narrow frame design;

It is applicable to EN 15194-2017.

MAIN FEATURES

This LCD meter combines the function of a stopwatch and a power assist thumb throttle to simplify process and reduce the cost of wiring harness integration. The compact and minimalist design style meets the needs of scooters, mopeds, and various models of electric vehicles. Switch kilometers or miles display units according to different market area settings to meet different markets.

IoT INTELLIGENT SOLUTION

Intelligent solution

One-stop solution of "smart terminal + APP + cloud platform".

Collect EBIKE information (riding data, location, alarm status, etc).

Send it to the car owner APP and Yunzhixing management platform.

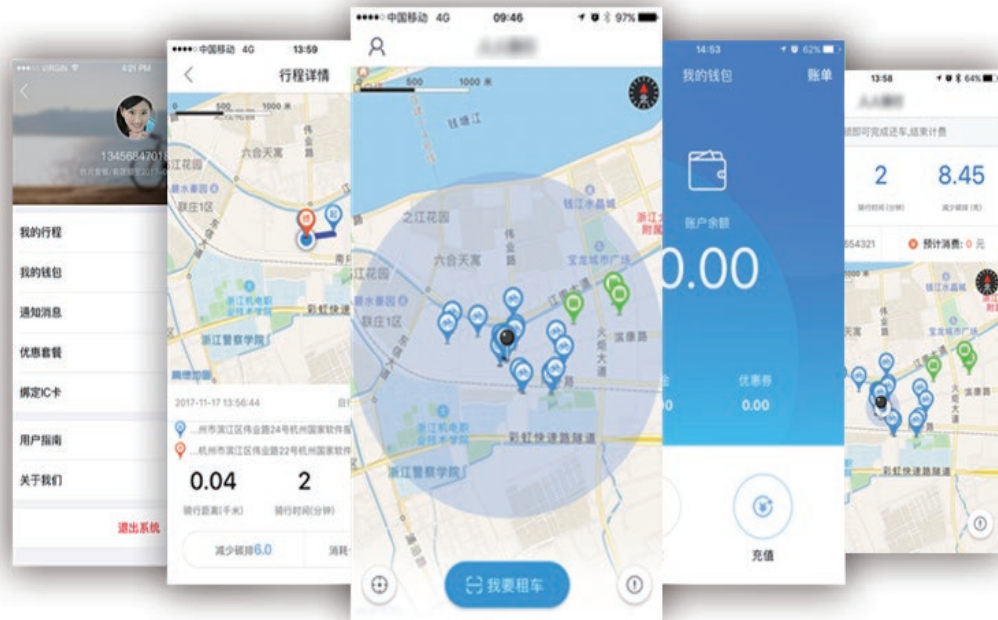

The intelligent vehicle can let the owner experience the Bluetooth sensor switch lock, one-button open seat bucket.

Intelligent anti-theft, location tracking and other functions.

INTELLIGENT HARDWARE

MOBILE TERMINAL

- One-key start**
 Users can control the vehicle switch through their mobile phones.
- Vehicle positioning**
 Obtains real-time vehicle location through GPS/Beidou.
- Status detection**
 Whole vehicle function detection to obtain information such as vehicle battery power, charging status, service life, etc.
- Safety warning**
 Real-time detection of vehicle vibration warning, illegal movement, and other abnormal situations when in armed state, with data synchronizing in real-time to mobile phones.
- Community sharing**
 Nearby stores, cycling information statistics, social sharing, business district culture.

CLOUD PLATFORM

- User management**
 Registration of user information, authorization, and sharing management.
- Vehicle management**
 User vehicle, cycling data, health information, location, and other data management.
- User care**
 User care setting and management.
- Community operation**
 Cycling community, forums, cooperative stores, advertising information promotion.
